

AI Fundamentals Notes

What is Artificial Intelligence (AI)?

Artificial Intelligence (AI) is a branch of computer science that enables machines to perform tasks that normally require human intelligence such as learning, reasoning, problem-solving, decision-making, language understanding, and pattern recognition.

Examples of AI

- Voice assistants (Siri, Google Assistant)
- Recommendation systems (YouTube, Netflix)
- Chatbots
- Self-driving vehicles
- Image recognition systems

What is Generative AI?

Generative AI is a type of artificial intelligence that can create new content such as text, images, videos, music, and code. Instead of only analyzing data, it generates original outputs based on patterns learned from large datasets.

Examples

ChatGPT, Gemini, Claude, Midjourney, and DALL·E.

What is a Large Language Model (LLM)?

A Large Language Model (LLM) is an AI model trained on massive amounts of text data to understand and generate human-like language.

LLMs can answer questions, summarize information, translate languages, generate content, and write code.

What is Prompt Engineering?

Prompt Engineering is the process of creating effective instructions or questions for AI models to obtain better results.

Example: 'Write a professional esports tournament announcement for BGMI with a ■10,000 prize pool.'

AI Application Workflow

User → Prompt → AI Model → Response → User

What is an API?

API stands for Application Programming Interface. It allows two software applications to communicate with each other.

What is an AI API?

An AI API provides access to AI models through code. Developers can send prompts and receive AI-generated responses without building their own AI model.

What is an API Key?

An API Key is a unique secret code used to authenticate requests to an API. It helps identify the application making the request and controls access to the service.

What is JSON?

JSON (JavaScript Object Notation) is a lightweight data format used for storing and exchanging information between systems.

Example: `{"name":"Tournyx Championship","game":"BGMI","prize_pool":10000}`
